- Spanish (Native)

PROFILE

Electronic technician with **10+ years of experience in hardware quality assurance, PCB diagnostics, and telemetry systems**, currently transitioning into **Software QA Testing**. Skilled in **manual testing, Selenium automation, Jira bug tracking, and API testing**, with strong troubleshooting and IT support capabilities.
Combines **hardware and software testing knowledge**, enabling deep system-level analysis and reliable defect detection across embedded and web environments. Currently preparing for **ISTQB Certification**.

WORK EXPERIENCE

Novanta Inc - Barcelona, Spain 2024 - 2025
Production Operator & QA Specialist

- Assembled and tested precision electronic components in a **medical-grade manufacturing environment**.
- Performed functional testing, defect identification, and QA reporting.
- Supported IT troubleshooting for production-line equipment.
- Ensured compliance with **ISO quality standards**.

Sitrack.com - Mendoza, Argentina 2023 - 2024
Hardware & QA Tester

- Tested **GPS telemetry PCBs**, including signal validation and firmware flashing.
- Developed manual and Selenium automated tests for embedded web interfaces.
- Managed defects and test cycles using **Jira**.
- Provided IT support to engineering teams and improved test coverage.

Sitrack.com - Chile & Argentina
Quality Control & QA Manager 2005- 2014

- Led QA operations for **vehicle tracking hardware and software systems**.
- Designed testing protocols for **PCB, CAN-bus, and serial communication systems**.
- Managed QA team, defined test standards, and improved product reliability.
- Coordinated with R&D to resolve complex technical issues and improve release quality.
